

Software Engineer with 4+ years of experience building production React and TypeScript applications, spanning B2B SaaS, AI-powered products, and end-to-end marketplace platforms. MSc in Data Science and AI with Distinction.

SKILLS

Languages	JavaScript, TypeScript, Python, HTML, CSS, Sass, SQL, GraphQL
Frameworks	React, Next.js, Material UI, Tailwind CSS, Framer Motion, Node.js
Tools	Git, Docker, Webpack, Vercel, Netlify, MongoDB, Figma, Cypress, Playwright
AI	Pydantic, MCP, OpenAI API, prompt engineering

EXPERIENCE

Software engineer <i>Quaisr</i>	Oct 2025 — Present <i>London, UK</i>
---	--

Frontend engineer (part-time)	Jun 2025 — Sep 2025
--------------------------------------	----------------------------

- Built the AI agent chat interface in React and TypeScript, implementing conversation branching, message editing, chat history management, and markdown export for a visual workflow editor platform.
- Integrated the agent chat system with MCP and Pydantic AI to power agentic workflow generation, building frontend interfaces with user confirmation steps for agent actions and connecting backend agent tooling.
- Contributed to backend development in C# and .NET EF, creating and managing database tables and API endpoints to support frontend features including conversation storage, agent message persistence, and skills management.
- Improved workflow editor functionality including block selection, grouping, copy-paste actions, keyboard shortcuts, and contributed to end-to-end testing with Playwright.

Frontend engineer <i>LoveCare</i>	Aug 2021 — Aug 2024 <i>Jakarta, Indonesia</i>
---	---

- Built an AI-powered caregiver matching engine using the OpenAI API, designing the prompt logic to factor in DISC personality profiles, care-specific experience, and competency skills, identifying the best-fit caregiver for each patient’s needs.
- Developed core dashboard features in React.js and TypeScript including booking and order management, caregiver profile management, and payment income views built with Chart.js, reducing support response times by 30%.
- Built and shipped the company’s public-facing website solo using Next.js and React.js, handling design and development, driving over 40% growth in digital engagement.

PROJECTS

Sing with Piano Collections	2022
------------------------------------	-------------

- Built and launched a fully live e-commerce platform for piano accompaniment sheets with real paying customers, handling end-to-end development including UI design, authentication, database management, and PayPal payment integration.
- Built a companion admin dashboard with sales tracking charts, sheet creation, and upload management.
- Stack: TypeScript, React.js, Next.js, Material UI, Apollo Client, GraphQL, MongoDB, Node.js, Express.js.

Wedding Invitation	2023
---------------------------	-------------

- Built a static wedding invitation website using Gatsby and Material UI, with Framer Motion animations and optimised images.
- Integrated the Google Sheets API for guest messaging, allowing guests to submit messages directly from the site.

EDUCATION

MSc Data Science and Artificial Intelligence (Distinction), University of Liverpool	2024 — 2025
--	--------------------

- Dissertation: built a computer vision pipeline using YOLOv8 to automatically extract football match events from scoreboard footage, including self-annotated training data, multi-model performance comparison, and automated timeline generation.
- Ranked 3rd within the university, ICPC UK & Ireland 2024 (competitive programming, team of three).
- International Student Ambassador.

BEng Industrial Engineering (First Class Honours equivalent), Parahyangan Catholic University	2017 — 2021
--	--------------------

- Runner-up, Internal Business Idea Competition (team of two).
- Statistics lab and teaching assistant.
